Chief Network Architect
Location: Monrovia, CA
Type: Full-Time

Overview:
Join NGA 911 LLC as a Chief Network Architect to lead the design and optimization of our network architecture. You'll play a critical role in ensuring secure and efficient emergency communication systems for Public Safety Answering Points (PSAPs) across the U.S.

Responsibilities:
Design and implement network solutions for emergency telecommunications.
Optimize network performance and security.
Collaborate with cross-functional teams to support operational goals.

Qualifications:
Must be able to pass a drug test and background check.
Bachelor's degree in Computer Science, Information Technology, or a related field (Master's degree preferred).
10+ years of experience in network architecture, design, and management, with a focus on large-scale enterprise networks.
Proven experience in leading network modernization projects and managing diverse technical teams.
Strong understanding of networking protocols, technologies, and best practices (e.g., TCP/IP, LAN/WAN, SD-WAN, VPN, cloud networking).
Excellent problem-solving skills and ability to work in a fast-paced, dynamic environment.
Strong leadership and communication skills, with the ability to convey complex technical concepts to non-technical stakeholders.
Certifications in relevant networking technologies (e.g., CCNP, CCIE, AWS Certified Solutions Architect) are a plus.

Benefits:
100% paid medical benefits
Vision and dental insurance
Flexible Spending Account (FSA)
Life insurance
401(k) plan
Landmark chiropractic services
Paid Time Off (PTO)
Flexible schedule
